

REMARKS

The Notice To File Corrected Application Papers required that a substitute specification be submitted and that formal drawings be submitted.

By this Amendment, a substitute specification and formal drawings are being submitted. The substitute specification is a duplicate, though reformatted, of the original specification with nothing added or deleted. The pagination is the same, although because of the reformatting, not all of the lines on a particular page are identical. Thus, no new matter has been added.

In addition, when a substitute specification was being prepared, it was discovered that the application papers submitted with this continuation application inadvertently had the last two lines at the bottom cut off. This omitted few lines has been added by this amendment. It is submitted that no new matter has been introduced since the original application and its first daughter continuation application contained these missing lines and the present application is a continuation of that daughter application.

Also, it was discovered that there were two grammatical errors in the application and this Amendment corrects those. No new matter has been added by these amendments.

Entry of this Preliminary Amendment is respectfully requested.

Respectfully submitted,

NATH & ASSOCIATES PLLC
